

Black Rhodium

Salsa

Salsa is the ideal choice for any serious audiophile looking for high quality speaker cable for full range speakers due to Black Rhodium's research and design processes, which are demonstrated in the following features and benefits:

- ✓ 2 core silver plated copper, 3mm² conductors, which not only offers ease of use, the single, low impedance connection between amplifier and loudspeaker offers superior imaging, as well as cleaner, tighter sound over mid and high frequencies, coupled with a well balanced bass.
- ✓ Silicone rubber insulation, which offers low dielectric loss, reducing time smearing effects. This enables accurate portrayal of the attack of leading edges, as well as the natural decays in music.
- ✓ Resistance = 6Ω per kilometre, Capacitance = 96pF per metre.
- ✓ Features our exclusive post curing process that removes impurities in the insulation, resulting in smoother sound less prone to harshness in music reproduction.
- ✓ Advanced quality control of the direction of wiring during the production process, delivering superior stereo imaging, as well as lower background noise.
- ✓ Features an attractive white finish which fits unobtrusively into any background..
- ✓ Available with 4mm gold plated locking plugs which offer a tight, reliable connection for consistently superior sound quality, or gold plated spade termination which offers similar benefits when firmly attached to binding posts.
- ✓ Cable manufactured in England, ensuring that we have close, face-to-face contact with the manufacturing and production facilities, and also shows that we support and are proud of British manufacturing.

"Brass and woodwind didn't appear lacking in any leading edge detail, with good resolution of subtle reverberation details and ambience clues." **Hi-Fi News Highly Commended**
